

## Kempsey – Food and related infrastructure maps; a collaboration

A collaboration between Australian Red Cross, Many Rivers Diabetes Prevention Program (University of Newcastle and Durri ACMS) and Kempsey Shire Council has produced a series of interactive web-based maps of Kempsey and the Kempsey Local Government Area. These maps provide detailed snapshots of existing community infrastructures overlaid on SEIFA areas.

Data included on the Kempsey town map includes:

- Location of all food outlets
- Transport routes
- Schools
- Emergency food relief
- Physical activity sites
- Healthy market basket sites
- Food desert buffer zones
- Take away alcohol outlets
- Take away food outlets

An excerpt of the Kempsey Geo-map

The interactive maps can assist with planning for land use and infrastructure; to aid research into food security, and to improve, monitor and evaluate availability of food outlets across the Shire.

The maps are available at: <http://www.kempsey.nsw.gov.au/healthy/foodmaps.html>
